

Leistritz
EXTRUSION TECHNOLOGY

ELONGATIONAL RHEOMETER

More process reliability. Better product quality. Less waste.

UNIQUELY INTELLIGENT

The only elongational rheometer for monitoring shear AND elongational viscosity rates

LEISTRITZ ELONGATIONAL RHEOMETER

Leistritz
EXTRUSION TECHNOLOGY

Discover the unique technology to monitor melt quality live in extrusion processes:

- Immediate identification of process parameter deviations saves material, time and waste
- Applicable to a wide range of polymers, compounds and re-compounds
- Easy integration into any extrusion or recycling extrusion process
- Patented hyperbolic slot die
